

Getting Started

iolo Search and Recover Home page

Recover Data

Rescue files, emails or an entire drive

- **Recover Deleted Files** to get back deleted files of any type.
- **Recover Deleted Pictures & Movies** to get back deleted pictures, photos, images and movie files.
- **Recover Deleted Songs & Sounds** to get back deleted song, sound and music files.
- **Recover Deleted Emails** from Microsoft Outlook, Outlook Express, Netscape Mail, QUALCOMM Eudora and Mozilla Thunderbird.
- **Perform Total Recovery** to salvage the entire contents of a drive, device or folder. All deleted data is automatically restored to the location you specify.

Advanced Disk Tools

Drive imaging tools for safe recovery and effortless backup and storage

- **Make a Copy of a Drive or Disk** to copy the contents of a drive into a drive image.
- **Create a Virtual Drive** to create a separate drive that simulates a physical drive.
- **Manage Drive Images** to view, create and edit all drive images and virtual drives.
- **Search for Lost or Damaged Partitions** to locate and then mount a lost partition.

File Terminator

Permanently erase sensitive information through the right-click menu

- With the **File Terminator** enabled, the ability to securely delete files is integrated into the Windows operating system.

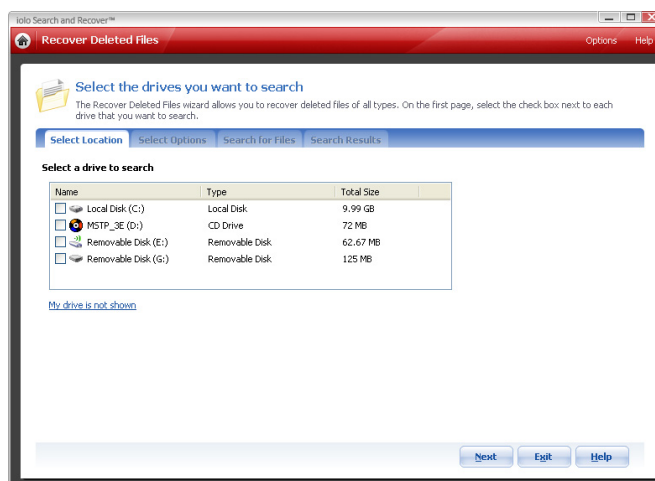

Data Recovery is Fast and Easy

Step-by-step wizards guide you through selecting search locations and scan options

Step 1:

Select the drives and devices that you want to search.

Search and Recover can find data deleted from computer drives, CD/DVDs, digital cameras, music players and more.

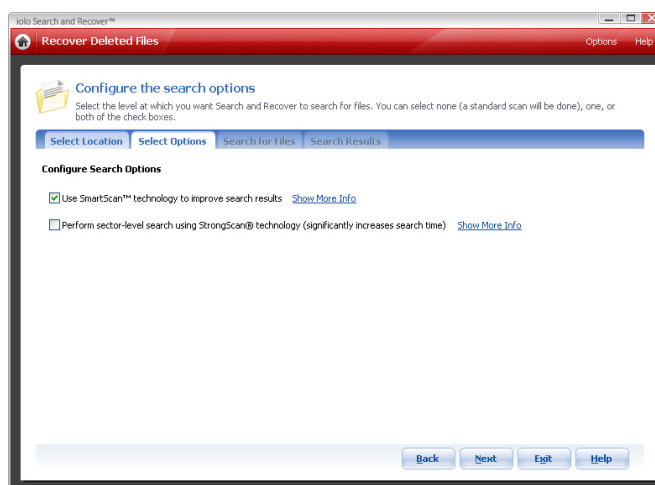

Recover Deleted Files Select Location

Step 2:

Configure the scanning options.

- **SmartScan®** technology skips over irrelevant and useless junk files, making it easier and faster to find the files you need.
- **StrongScan®** technology performs a deeper, sector-level scan to find and reassemble data.

It performs a byte-by-byte search that can recognize data deleted from unbootable, damaged, formatted or repartitioned drives.

Recover Deleted Files Select Options

Step 3:

Search and Recover displays the progress of the search, with an estimated time remaining and a running total of the number of deleted files found.

When the search completes, the results display on the last screen (shown on the next page).

Get Back Only the Needed Files

Recover the files you want with one click

Instantly recover or terminate files

Find the exact file you need through previews and filters

Use the viewer toolbar for one-click recovery, termination and imaging controls

Recover Deleted Pictures and Movies Media View

Media View

- Preview photos, images, movies, songs, HTM files and more
- Photos and images can be rotated and resized—even before recovery
- Play, pause and control volume for songs—even before recovery

Recover Songs and Sounds Media View

Details View

- See detailed information including file type, file size and quality of recovered file
- Filter results based on file name, file type, date ranges, original location and size
- Recover or terminate (permanently delete) a file or group of files with one click
